SKYWORLD Development Group bagged the prestigious Top 10 Developer Award at the 2019 BCI Asia Awards.

The award was for SkyWorld's achievements as a developer with a big impact on the built environment in the property construction industry.

The BCI Asia Awards 2019 gala dinner held in JW Marriott, Kuala Lumpur, saw a number of renowned property developers in Malaysia in attendance.

This award recognises the excellence of property developers who have made a significant contribution to sustainability and achieved confirmed Green Building ratings.

"It is an honour to be conferred a top developer at the BCI Asia Awards. I would like to thank the team at SkyWorld and all our business associates for their efforts.

"I am happy that our unwavering focus on quality and sustainability has been recognised once again," said SkyWorld chief operating officer Lee Chee Seng.

The BCI Asia Top 10 Awards is held annually in seven Asian countries – Hong Kong, Indonesia, Malaysia, the Philippines, Singapore, Thailand and Vietnam.

Environmental sustainability in the form of green building index (GBI) certification has become part of the award's consideration, rewarding developers that play an active role in making Malaysia's cityscape safer and more environmentally focused.

On SkyWorld's emphasis on sustainability and quality, Lee said, "Nothing comes easy and we work tirelessly in pursuit of our vision to be the best city developer that provides ultimate sky living experience in a sustainable environment.

"Over the years, SkyWorld continues to grow and has made a name for itself as a responsible developer that builds with heart. Quality and environmental sustainability are inherent qualities in all properties bearing the SkyWorld trademark as we are committed to Qlassic rating for all our projects.

"Tonight, we are very happy and proud to see that our efforts have been recognised by BCI Asia Awards. It will definitely motivate us to do better and achieve higher."

Backed by a strong and experienced management team, SkyWorld Development looks forward to transforming the city skyline, one development at a time in a sustainable environment.

"I also want to recognise all SkyWorld property owners that have entrusted us to bring their dream home to life. Today's award is for you and we thank you for that confidence," concluded Lee.
